(54) Title: METHOD, SYSTEM AND COMPUTER PROGRAM FOR DISPLAYING INFORMATION

(57) Abstract: This invention relates to a computer program for displaying information in the form of a display window during a downtime when a computer user is waiting for a computer to complete processing tasks, and referred to herein as a wait event, the program including the steps of detecting a wait event and activating an information datafile or information (a) or activating the program manually by the user; displaying information on a computer monitor in the form of data and/or graphics and/or video and/or audio material (b); and suspending the program when the wait event has ended or when suspended manually by the user (c), such suspension resulting in the disappearance of the display window.
